STALL WARNING INDICATOR LIGHT

THIS MS25041-6 RED MIL-SPEC INDICATOR INSTALLS IN THE PANEL AT THE ORIGINAL OR ANY LOCATION CONVENIENT AND VIEWABLE IN SCAN FOR THE PILOT. ITS PURPOSE IS A BETTER INDICATOR LIGHT FOR THE STALL WARNING OPERATION. **OPERATION OF THE BULB-TEST FUNCTION IS NOT AVAILABLE DURING STALL FUNCTION** DUE TO THE DESIGN OF THE STALL CIRCUIT, AND THAT WOULD NOT BE THE APPROPRIATE TIME TO TEST THE BULB ANYWAY! THE BULB-TEST FUNCTION OPERATES NORMALLY OTHERWISE WHICH IS ACTIVATED BY DEPRESSING THE LENS; NO DIM FUNCTION IS REQUIRED IN THIS APPLICATION.

THE KIT CONTENTS INCLUDE COMPLETE REQUIREMENTS FOR THE INSTALLATION: THE MS25041-6 RED [NON-DIMMABLE] INDICATOR PROPERLY ASSEMBLED WITH MS22759/16-20 TEFZEL WIRE MARKED USING THE KINGSLEY HOT-STAMP PROCESS. PVC SLEEVES TO COVER THE KNIFE DISCONNECTS, NYLON CABLE TIES FOR SECURITY, INSTRUCTIONS AND SCHEMATIC ARE ALSO INCLUDED. EXPECT AN EXPERIENCED INSTALLER TO DO THE INSTALLATION IN 1/2 TO 1-1/2 HOURS.

INDICATOR LIGHT INSTALLED IN RON AND JOHN'S STC'D *Comanche* PANEL
