

Update Your Sun Visors!

- **Affordable**
- **Provides maximum protection from disabling glare**
- **Uses your existing mounts**

As an optometrist and Comanche Owner, (ICS# 13091), I wanted better sun visors for my Comanche, so I obtained field approval for my anti-glare sun visors. The parts include black anodized and precision machined aircraft-grade aluminum, with contrast-enhancing bronze acrylic. I used physiological optics technology to ensure the tint is the best density and spectrum to block direct and scattered sunlight and minimize adaptation time to dusk light conditions.

\$10 plus S & H includes plans and 337 Field-Approved paperwork. A perfect sample pair for your use as a pattern to make your own is available for a \$179 deposit, refundable IF returned within 15 days. No returns after 15 days. Call, fax or email with your mailing address and credit card information.
